Education

Veer Narmad South Gujarat University

Bachelor of Computer Application (CGPA: 8.89/10)

July 2022 – April 2025

Surat, Gujarat

Experience

NJ India Invest Private Limited

Software Engineer Intern

July 2024 – April 2025

Surat, Gujarat

- Migrated a legacy PHP module to Java using a layered Spring MVC architecture (JSP, Controllers, Services, Repositories), improving system performance by 30% and significantly enhancing code maintainability.
- Engineered responsive JSP UIs with AJAX to enable seamless asynchronous data loading, reducing full page reloads by 80% and elevating overall user experience.
- Optimized data access with efficient SQL queries and Java Collections, improving query execution speed by 25%
- Contributed to early feature delivery in a fast-paced agile team.

Projects

Quizify – Quiz Web Application | *Spring Boot, React, PostgreSQL* | **GitHub** | **Live**

April 2025 – May 2025

- Built a scalable full-stack quiz platform using Spring Boot, React, and PostgreSQL, enabling secure user registration, email verification, and real-time quiz access for over 200 users.
- Implemented role-based access control with Spring Security (JWT), securing 10+ REST APIs for Admin, Teacher, and Student roles; reduced unauthorized access incidents to zero.
- Optimized content creation workflow by 40% through efficient REST API design using Spring Data JPA, and containerized the backend with Docker; delivered a mobile-first responsive UI with React with Typescript.

GymSarathi - Gym Management System | *Node.js, Express.js, React* | **GitHub** | **Live**

Feb 2025 – April 2025

- Built MERN-stack gym management system with RESTful APIs, streamlining operations for 50+ users and improving data access efficiency.
- Implemented role-based dashboards and QR code-based attendance tracking, enhancing user engagement and operational workflows.
- Integrated real-time chat and data visualization features, demonstrating proficiency in scalable full-stack development.

Meratodo – Task Management & Collaboration (Microservices) **GitHub** | **In Development**

- Designed and implemented a microservices architecture for a task management platform, developing key services including Auth Service (JWT, OAuth2, encryption, email verification, 2FA), User Service (profile management, RBAC), and Notification Service (real-time alerts via Kafka).
- Integrated inter-service communication using gRPC for efficient synchronous calls and Kafka for asynchronous event-driven messaging, ensuring scalability and fault tolerance in a distributed system.
- Developed User, Team, Project, and Task Management modules with role-based access control and method-level authorization, enabling secure collaboration across Admin, Owner, Editor, and Viewer roles.

Technical Skills

Languages: Java, JavaScript, Typescript, SQL

Developer Tools: VS Code, IntelliJ IDEA, Postman

Technologies/Frameworks: Spring Boot, Spring Framework, React, Spring Security, Spring Data JPA, Docker, Kubernetes, Kafka, gRPC, Git/GitHub, Swagger, Junit

Databases: MySQL, MongoDB, Redis

Leadership / Extracurricular

Team Lead - Internship Project Modules

Dec 2024 – Jan 2025

NJ India Invest Private Limited

Surat, Gujarat

- Led the development of two critical modules, BizMall MDMS and Printshop Turn over Report, during my internship, coordinating tasks across frontend and backend teams.
- Collaborated with cross-functional teams to ensure timely delivery of features, resulting in improved system performance and maintainability.

Achievements

- Earned 3 badges on coding platforms for problem-solving excellence.
- Solved over 250 Data Structures and Algorithms (DSA) problems on platforms like LeetCode and GeeksforGeeks, strengthening algorithmic thinking and coding proficiency.

Certifications

- Spark 2.0: Job Ready Java Full Stack Course **Link**
